POLLOCK Industries

300 Watt, 48 Volt, Medical Safety Certified Single Output Power Supply with PFC

UNIT CODE	DESCRIPTION
MED-PS 300-48V	300 Watt, 48 Volt, Single Output Medical Power Supply with Active PFC Function

SPECIFICATIONS				
AC Input	Output	Approvals		
Universal AC input 85 ~ 264V	+48VDC @ 0 ~ 7A	Te c Plus CBCE		

Features at a Glance:

Medical safety certified, MOOP level Built-in active PFC function, PF>0.95 Withstands 300VAC surge for 5 seconds Low leakage current <300µA/264VAC No load power consumption < 0.5W Standby 5V @ 0.3A

1U low profile case: 41mm

Protection: Short circuit; Overload; Over voltage; Over temperature

Built-in: Constant current limiting circuit; Remote ON-OFF control; DC OK signal; Cooling fan with ON-OFF control

Working temperature range -40°C ~ +70°C

Certificates: UL / CUL / CB / CE

Safety standards: ANSI/AAMI ES60601-1,

IEC60601-1 approved

EMC standards: Class B level

(see following pages for complete EMC details)

MTBF: 176K hrs min. MIL-HDBK-217F (25°C)

Case: 980A

Weight: 1.69 lbs (0.77 Kgs)

Dimensions: 7.83 x 4.13x 1.61 inches (LxWxH)

199 x 105 x 41mm (LxWxH)

5 year warranty

Release & Application Notes

The MED-PS 300 series are medium power, highly reliable power supplies deigned to meet the rigerous demands of the medical device and equipment markets. These are 300 Watt, compact, efficient, AC/DC enclosed medical type power supplies that comply with international medical safety regulations (MOOP level).

Standard functions include built-in remote ON/OFF control, protections for short circuit, overload (constant current mode), over voltage, and over temperature. Additionally, with low leakage current (≦300µA), extremely low no-load power consumption (<0.6W), 1U low profile (41mm). This series meet the high quality requirements for medical applications and are an excellent choice for non-patient contact instruments and equipmet. Global certificates of compliance meeting UL/CUL/CB/CE medical safety requirements ensure users' safety. EMI, Class B Level, compliant.

Suitable applications include medical and diagnostic equipment requiring low leakage current such as lab and analysis equipment, monitoring equipment, MRI & X-ray machines, CT Scanners, chemical or biological detection equipment, as well as any system requiring low leakage current and/or low, no-load, power consumption.

Pricing: $1 \sim 9 \$ 229.00$

10+ 206.50

25+ 184.50

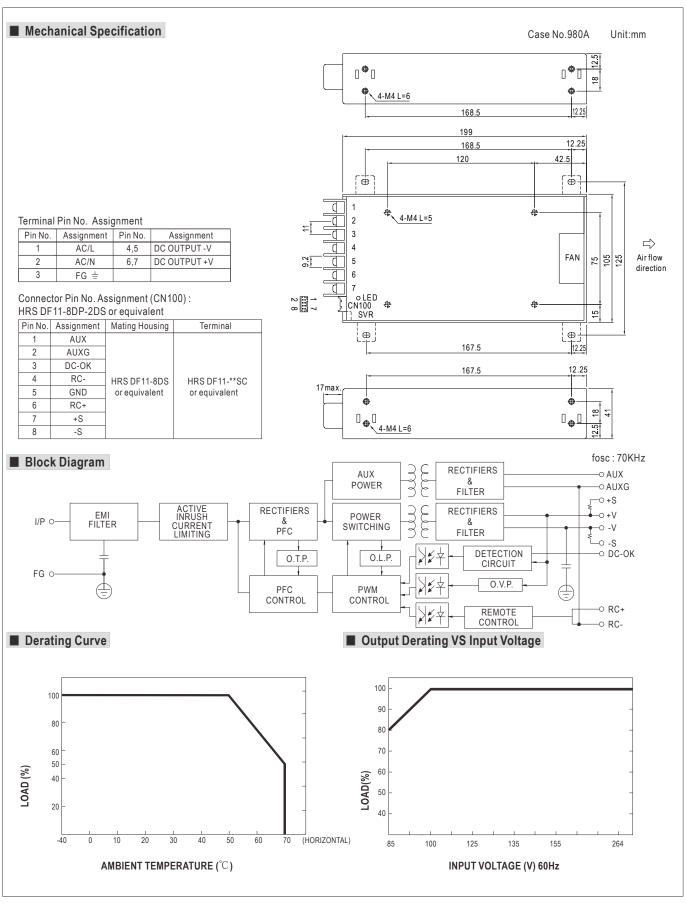

Features:

- Universal AC input / Full range
- Built-in active PFC function, PF>0.95
- High efficiency up to 89%
- Withstand 300VAC surge input for 5 seconds
- Protections: Short circuit / Overload / Over voltage / Over temperature
- Built-in constant current limiting circuit
- 1U low profile 41mm
- Medical safety approved (MOOP level)
- Built-in cooling fan ON-OFF control
- Built-in DC OK signal
- Built-in remote ON-OFF control
- Standby 5V@0.3A
- Built-in remote sense function
- No load power consumption<0.5W (Note.6)
- 5 years warranty

 All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor. Tolerance: includes set up tolerance, line regulation and load regulation. The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to EMI testing of component power supplies. (as available on http://www.meanwell.com) Derating may be needed under low input voltages. Please check the derating curve for more details. No load power consumption SW when RC- & RC+ (CN100 pin4,6) 0 ~ 8V or short.

File Name:MED MPS-300-SPEC 2014-12-12

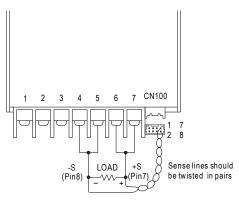

■ Function Description of CN100

Pin No.	Function	Description
1		Auxiliary voltage output, 4.75~5.25V, reference to pin 2(AUXG). The maximum load current is 0.3A. This output has the built-in oring diodes and is not controlled by the "remote ON/OFF control".
2	AUXG	Auxiliary voltage output ground. The signal return is isolated from the output terminals (+V & -V).
3	DC-OK	DC-OK signal is a TTL level signal, referenced to pin5(DC-OK GND). High when PSU turns on.
4	RC-	Remote control ground.
5	GND	This pin connects to the negative terminal(-V). Return for DC-OK signal output.
6	RC+	Turns the output on and off by electrical or dry contact between pin 4 (RC-), Short: Power OFF, Open: Power ON.
7	+S	Positive sensing. The +S signal should be connected to the positive terminal of the load. The +S and -S leads should be twisted in pair to minimize noise pick-up effect. The maximum line drop compensation is 0.5V.
8		Negative sensing. The -S signal should be connected to the negative terminal of the load. The -S and +S leads should be twisted in pair to minimize noise pick-up effect. The maximum line drop compensation is 0.5V.

■ Function Manual

1.Remote Sense

The remote sensing compensates voltage drop on the load wiring up to 0.5V.

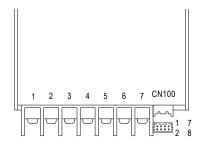

Fig 1.1

2.DC-OK Signal

DC-OK signal is a TTL level signal. High when PSU turns on.

Between DC-OK(pin6) and GND(pin4)	Output Status
3.3 ~ 5.6V	ON
0 ~ 1V	OFF

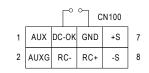

Fig 2.1
